

# SIEM Migration

Rely on SOC Prime's expert team to obtain out-of-the-box migration of log sources, applications, and custom detections directly into your environment. Save development time and SIEM migration costs with Uncoder AI by enabling cross-platform translation for any SIEM, EDR, and Data Lake language format.

## Advantages

- **4 Months Saved on SIEM Migration**
- **85% Faster** Cross-SIEM Content Translation
- **100% Detection Content Quality**
- **30-Day SLA** Commitment for Migration

## Highlights

- Make security content portable
- Reduce MTTD and MTTR
- Increase ROI for security solutions in use
- Speed up the entire CI/CD workflow for detection procedures
- Enhance the scalability and SIEM performance
- Ensure cost-efficient searchable storage

## Uncoder AI: Cross-Platform Query Translation Engine

SOC Prime’s Uncoder AI, a professional IDE & co-pilot for Detection Engineering enables cross-platform query translation for 12 SIEM, EDR, and Data Lake native languages or open-source language formats like Roota and Sigma.

CTI Enrichment	Your Language, Your Rules	Full Privacy
Automatically enrich your translations with tailored CTI, false positive context, triage, and audit configuration recommendations.	No matter what language format, Uncoder AI supports on-the-fly remapping to your data schema in use for customized deployments.	Work with detection code in a fully trusted environment. No data logging and no code sharing with third parties.

## About Us

SOC Prime operates the industry-first modular platform for collective cyber defense against attacks of any sophistication and fast attribution. The Platform is backed by the world’s largest library of detection algorithms and tailored threat intelligence powered by our mature engineering team, global CERTs, third-party consultancy, and the global crowdsourcing program for cyber defenders. We have established a dedicated Professional Services team to help our enterprise clients maximize their security investments and turn their strategic vision into an actionable roadmap for long-term success.

## Expertise: Vendor-Agnostic, Business-Specific

**40+**

Experts in SIEM migration

**30+**

Platform expertise

**400K+**

Detection algorithms

We have solid experience in implementing and enabling the migration of terabytes of data for hundreds of companies, including government organizations in Europe and the USA. SOC Prime delivers migration assistance to the cloud-based environment both to large-scale enterprises and our MDR partners.
